Good software. Made carefully.

Kumiko builds and improves software for organizations that need focused engineering capacity. We support prime contractors and service partners with custom applications, integrations, automation, modernization, deployment, and existing-system improvement.

01 CORE CAPABILITIES

- Custom software and web application development
- Internal business applications and operational tools
- Systems integration, APIs, and workflow automation
- Modernization, refactoring, and rescue of existing software
- Maintenance and enhancement of production applications
- Deployment, production hardening, and documented handoff
- Device integration, firmware, and board-level electronics repair

02 ENGAGEMENT FIT

- Subcontracted engineering for primes, MSPs, agencies, and consultancies
- Focused work packages and application components
- Integrations and white-label implementation
- Remote-first delivery into client-owned production accounts

04 SELECTED WORK

Rebar

PRE-RELEASE · IOS & ANDROID

Photo-point monitoring app for land managers and restoration groups: ghost-overlay retakes with compass and tilt alignment, local-first data, and funder-ready reports.

Atorasu

INTERNAL PRODUCTION TOOL

Procurement-intelligence pipeline in Go and SQLite. Collects solicitations from SAM.gov and four state and municipal platforms, preserves source evidence, deduplicates, and scores fit with explainable, deterministic rules.

05 DIFFERENTIATORS

- Owner-led delivery: you work directly with the engineer doing the work
- Customer-facing software and internal operational tools
- Fixed-scope work packages with clear acceptance criteria
- Client ownership and low vendor lock-in built into delivery
- Deployment and documented handoff included; ongoing support scoped separately
